# Lil' GRO Veg Wedge Parts List

A • QTY 4

B • QTY 2

C • QTY 2

D • QTY 1

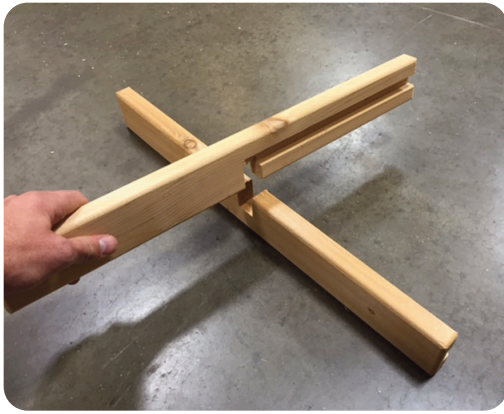

E • QTY 1

F • QTY 2

Other Parts include: Hardware Package & Landscape Fabric

1.

Take two parts A and place them inside each other's notches, keeping the grooved parts going in the same direction, as shown above.

2.

Place part B in the grooves, tight to the bottom of the grooves, as shown above.

3.

Place part C on top of part B, keeping it tight to part B and the inside of the grooves, as shown above.

4.

Before moving onto the next step, make sure that the gaps between the top of part C and the tops of parts A are equal and approximately 3/8", as shown above.

5.

Lay this assembly on a flat surface and secure them together using the provided 2 1/2" screws, through the predrilled holes, as shown above. Repeat steps 1-5 for the other end.

6.

Next, put the X braces upright & apart, approximately the length of the trough boards. The Lil' GRO logo will be on the outside of both ends.

---

7.

Place part D in the "V" first, with the smooth side out, making sure you keep the ends tight to the X braces as shown above.

8.

Once the trough board is in place, attach it to the Wedge frame through the pre-drilled holes, using the provided 1 1/2" screws as shown above. Be sure to keep the X brace tight with the trough boards.

9.

Next, place Board E in the Wedge, on top of part D, making sure the notches are facing down & keeping the smooth side out. Continue to attach the boards as you place them. It is important the notches face down for drainage.

10.

Place two parts F on each side of the Wedge, keeping the smooth side out and the groove all the way down on the tongue of the preceding board. Attach them as shown in Figure 8.

**We highly suggest sealing your Lil' GRO Veg Wedge. This will lengthen the life of your Lil' GRO Veg Wedge, helping protect it from the sun, rain & other elements.**
